WHY TOCVAN?

EXCELLENT SHARE STRUCTURE

Tocvan has been able to sensibly finance from its IPO stage and maintain a tight share structure with only ~37M shares outstanding after a 5.125M financing.

PRECIOUS METALS FOCUS

Current economics and world events have investors seeking safe investments, precious metals have historically acted as a hedge against inflation.

PROVEN & PROSPECTIVE PROJECTS

Tocvan is earning 100% into 2 exciting projects in Sonora, Mexico. The Pilar Project is a near-term producing open pit project and the El Picacho Project is fully permitted for drilling and holds multi-million ounce potential.

OUR MISSION

Identify undervalued, advanced stage targets with potential for large scale mineral resources. **Create** shareholder value through acquisitions and strategic partnerships. **Advance** our project portfolio with technical tact and aggressive drill targeting. **Build** our team from the strength of local technical talent and strong community relationships.

THE PILAR PROJECT

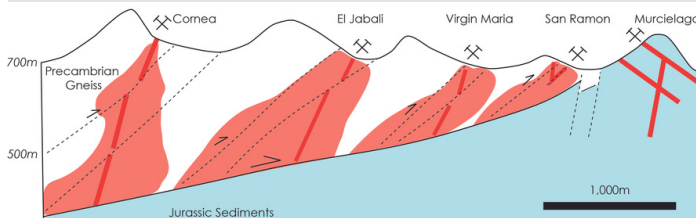

HIGH GRADE FINDINGS ABOVE REGIONAL AVERAGE

- The average grade of regional reserves are approximately **0.50 g/t Au**.
- Recently completed metallurgical samples achieved a head grade of **0.4 g/t Au to 5.0 g/t Au with a gold recovery range of 88.9% to 96.9%**.

EL PICACHO PROJECT

MULTI-MILLION OUNCE POTENTIAL

- Strategically located within the Caborca Orogenic Gold Belt that is historically known for multi-million ounce producing mines.
- Geology and structural features are favourable to the orogenic gold model.
- 5 primary target areas have been defined showing excellent potential from surface sampling and historic underground workings.
- Fully permitted for 15,000m of drilling and 2,000m of trenching across 5 primary targets.
- 6km of prospective trend over a 24km² area.
- Road accessible with railroad 2km east of Picacho.

TOCVAN VENTURES

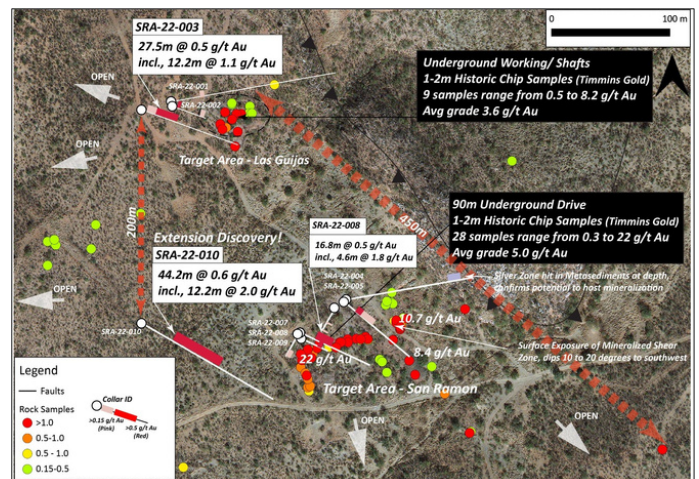

ADVANCE STAGE NEAR-TERM PRODUCTION

- The Pilar Project is a low-sulphidation Au-Ag epithermal system just 130km southeast of Hermosillo in Sonora, Mexico.
- Over 20,000m of drilling has been completed to date and new drilling has identified near-surface oxide gold mineralization.
- Steadily advancing towards a resource definition, continuing to achieve most significant findings to date.

HIGH GRADE DRILL RESULTS

- 116.9m @ 1.2 g/t Au, including 10.2m @ 12 g/t Au and 23 g/t Ag
- 108.9m @ 0.8 g/t Au, including 9.4m @ 7.6 g/t Au and 5 g/t Ag
- 24.4m @ 2.5 g/t Au and 73 g/t Ag, including 1.5m @ 33.4 g/t Au and 1,090 g/t Ag
- 94.6m @ 1.6 g/t Au, including 9.2m @ 10.8 g/t Au and 38 g/t Ag
- 16.5m @ 53.5 g/t Au and 53 g/t Ag

DISCOVERY AT PICACHO MAIDEN DRILL PROGRAM HIGHLIGHTS

- Hole SRA-22-003 returned **27.5-meters of 0.5 g/t Au, including 12.2-meters of 1.1 g/t Au**, from 21.4-meters depth.
- **100m Step-Out Hole SRA-22-010 returned 44.2-meters of 0.6 g/t Au**, from 41.2-meters depth
- including **12.2-meters of 2.0 g/t Au and 7 g/t Ag**
